

USEFUL APPLICATIONS. CONNECTED WORK.

Frontier AI. Practical advantage.

SOA helps you realize the efficiency and productivity gains unlocked by frontier AI, from bespoke automated workflows to consumer-facing applications.

- SOA Group Inc, founded in 2012.
- AI experts with experience spanning Magnificent Seven companies and frontier AI startups.

Automate work with clear rules.

- **Automate processes** with defined inputs, rules, and outcomes; route exceptions and approvals to people.
- **Connect knowledge** from approved documents, current records, and staff expertise, with sources visible.
- **Build assistants, workflows, and bounded agents** with evaluation, access controls, and operating ownership.

Six industries. Practical opportunities.

Technology and IT

- Connect customer service chatbots to account records, ticket status, and case updates.

Logistics

- Automate order intake, dispatch, delivery records, and invoices; flag mismatches.

Construction

- Search project knowledge; draft requests for information with supporting references.

Financial Services

- Collect onboarding documents, flag missing information, and prepare files for staff review.

Manufacturing

- Match quotations, orders, receipts, and invoices; route discrepancies and approvals.

Natural Resources

- Search manuals, maintenance records, and staff expertise; draft work orders for review.

Work with existing systems: Salesforce, Dynamics 365, ServiceNow, legacy SAP ERP, and on-premises Oracle databases, through authorized APIs, connectors, or gateways.

CLIENT WORK · ONGOING ENGAGEMENT

An AI platform for recruiting operations.

SOA is building and extending a platform for an external recruiting agency, connecting candidate intelligence with discovery, outreach, submissions, and interview coordination.

The original workflow

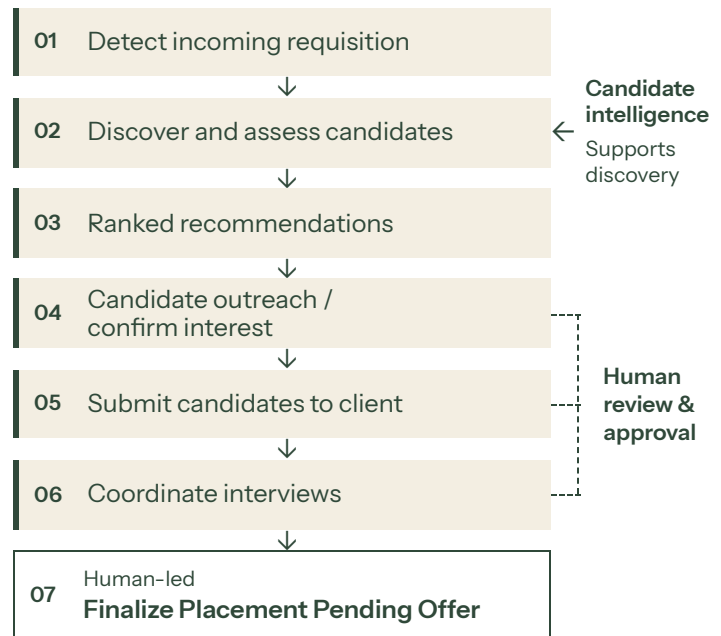

- Recruiters sourced and assessed all candidates after each hiring requisition.
- Outreach, submissions, and interviews ran through the existing ATS and email.
- Finalization pending offer was human-led.

Built to free time for growth

- Less busywork:** automate routine tasks and administration.
- More candidate engagement:** free time for personal conversations and relationships.
- Greater scalability:** support more recruiting activity with less manual coordination.
- More business development:** give staff more time to win and grow client relationships.

AI-supported workflow

Steps 1-6 platform-led

Technology stack

- AWS:** cloud hosting
- Claude Models Suite:** AI inference
- PostgreSQL:** lexical search
- Temporal:** asynchronous workflows
- Amazon Nova:** semantic search

A bespoke solution, built with the client. SOA is building and extending the platform around the agency's workflows and systems, including a fully functional interface for staff review and approval.

How we can engage

Independent entry points

CONSULTING

- Assess opportunities, feasibility, requirements, and costs. Receive options, a recommendation, acceptance criteria, and an implementation plan.

SOLUTIONS

- Build and integrate software. Evaluate, prepare deployment, and plan adoption, maintenance, monitoring, and handover within scope.

Bring a new use case, existing application, or stalled pilot.
